

## **General Preventative Maintenance Expectations**

The maintenance of the van is especially important. Lack of attention to a few simple details can cause the program costly mechanical repairs and delays and inconvenience for you and your riders. When you get into the habit of preventative care by making regular inspections, you will have greater confidence operating the van and can avoid more serious repairs.

UTA provides a list a daily, weekly and monthly inspections and a schedule for preventative maintenance. Maintenance and repair services are performed at various authorized service providers, a list of which can be found at [INSERT LINK](#). The van should be cleaned and washed regularly. Please review the UTA Vanpool Manual for additional maintenance information and requirements. You may contact a member of the UTA vanpool maintenance staff regarding any questions or concern regarding the maintenance of your van.
